# PolyWhey® – a Better Wood Finish... *Naturally*

PolyWhey is the next generation of polyurethane, a truly waterborne wood finish that meets the highest professional and environmental standards.

## NEW!

### *Introducing our Exterior Wood Finish*

- Durable – creates a non-toxic, waterproof barrier between the wood and the weather
- Protects wood from harmful UV rays, mold and mildew
- A tough, element-repelling clear finish for decks, fences and other outdoor wood surfaces
- Less than 95g/L VOC content

### *Interior Floor and Furniture Finishes*

#### *Professional quality with unprecedented performance...*

- Durable – twice the hardness of other waterborne finishes
- Seals and protects against water and chemicals
- Clear finish enhances wood grain without yellowing
- Can be applied over oil-based stain or finish, as well as other water-based finishes
- Easy, single product application
- More coverage per gallon
- Fast drying – under 2 hours
- Easy cleanup with soap and water

#### *Environmentally safe products made from a sustainable and renewable resource...*

- PolyWhey complies with requirements of Material Resource Credit 4.1 and Environmental Quality Credit 4.2 under LEED®.
- Indoor VOC levels of less than 180 g/L surpass the toughest U.S. standards
- Safe for humans and pets
- Neutral odor

## Finally, a premium product that is durable and safe.

You no longer have to choose between a wood finish that is high quality, professional grade and green. Vermont Natural

Coatings uses local resources and Vermont craftsmanship to create our premium products. No other products in their class are as safe for the environment and manufactured using environmentally sustainable processes.

Whey proteins are the naturally durable ingredient that makes our products different and better. Whey is a by-product of cheese-making, and Hardwick is in the heart of Vermont's dairy farming industry. We harvest this renewable resource from farms to make a durable coating that is virtually odor free, gets great coverage, and dries quickly to get you to your next project.
